HOW TO CONDUCT SEARCH & RESCUE IN THE LARGEST URBAN AREAS

By Peter Lohmann

SEARCHING

In the aftermath of a major disaster, search and rescue teams face a daunting task: finding survivors in a vast, chaotic urban environment. This article explores the challenges and strategies involved in conducting large-scale search and rescue operations.

TO CUT OR NOT TO CUT?

Cutting techniques for today's vehicles

By David Stuenkel

Like a surgeon, a firefighter must be precise when cutting through a vehicle's body panels. This article discusses the latest techniques and tools used for vehicle extrication.
